

# MOBILE APP FOR SCHOOLS

## Connecting Educators, Students & Parents

**LetzTalk**®  
Education Engagement Platform  
The Power of Mobile Synergy™

# Mobile Collaboration

The huge opportunity with mobile is that it really is the primary portal for social communication today whether it's digital interactions in business or personal. In today's connected society, utilizing digital communications is a critical part of daily living. Clearly, there's a major disconnect in the way that the school and teachers are currently communicating and the (mobile) way that most of the world is getting information.

Young people learn best when it's relevant to them, when there's social connection tied to it, and when they actually have a personal interest in the topic. Like any implementation, committing to a mobile engagement platform requires planning. You need to understand what you're doing and why. Smartphones can be used for a lot of things. Nobody wants their student's texting or using WhatsApp during class. But, what if you could get participation in discussions, give students alerts on extra-curricular activities or reminders when homework is due, assist on a difficult subject or build rapport with the parents?

Mobile devices allow students to take responsibility for their learning by connecting formal and informal learning inside and outside the classroom. LetzTalk Education Engagement Platform provides unprecedented opportunities for interactive engagement between parents, teachers and students.

## Digital Hub

The LetzTalk Education Engagement Platform is a digital hub that facilitates exchange and communication flow between educators, parents and students. In effect, it's a modern day digital watering hole where communities can develop and share information & resources. It becomes the central place to stay informed on happenings, a pathway for the exchange of information, a way to communicate and build relationships. The platform helps keep parents informed on the day to day activity of students.

## Academic Achievement

The platform helps keep students engaged beyond the walls and boundaries of the classroom to interact with teachers. If students are more engaged in what is going on in the classroom and outside classroom, they become more connected with what's happening in their courses and with the help of their teachers – this can positively impact on academic success since communication barriers no longer exist.

## Fostering Relationships

Promoting transparency, relationships, building communities, fostering and nurturing a digital place where learning happens without restraint, to receive and share information and resources, of which positively affects teachers, students and parents. These are the guiding principles underlying the design of the LetzTalk Education Engagement Platform. The platform seamlessly brings people together whereby communities can develop. Where collaboration and communication can take place effortlessly with a personalized human touch. There are so many engagement scenarios for the platform involving teachers, students and parents, that the possibilities to engage are limitless.

## Google Drive Integration

The app has built-in integration with cloud storage by Google Drive by offering a seamless user experience to access and upload documents to the cloud. This makes it even easier to capture, organize, and collaborate on important documents whenever and wherever in order to get work done.

# Mobile App Functions

## Mobile and Web Applications

### Newsfeed

Stay informed on news and updates.

### Forms and Documents

Share resources and media.

### Notifications

All notifications delivered in real-time. No missing out on important news

### School Calendar

Keep up to date on school events throughout the year.

### Class Schedule and Events

Keep up to date on all matters affecting the class.

### School Admin Dashboard

- System Configuration
