

*Introducing*  
**AsotaHub®**

Production  
Efficiency  
Monitoring

# What is AsotaHub?

Having the right information accessible across the board from management to workers on the shop floor, means that the goals and deliverables are clear to everyone involved.

It is a fully fledged real-time Production Efficiency Monitoring application enriched with a world class Sales Order and Billing system while providing insights on production and sales for both management and the clients.

It works by posting real-time production data to Production Efficiency Dashboards. The dashboard has the relevant manufacturing KPIs, actual performance versus targets. The dashboards can be displayed on large TV monitors on the production floor where it matters, motivating workers to reach their targets. Based on a robust, scalable platform means the solution can be enhanced for customer-specific business requirements allowing integration with your existing business processes and systems. Since the platform is cloud-based means whether you onsite or out of office, you will still have a real-time view of production efficiency for all facilities.

AsotaHub is a stairway approach to technology and business transformation. The systems of yesteryear were a painful, multi-year big-bang implementation odyssey that commonly resulted in over-promising and under-delivering. Force4Technology recommends taking small steps to transform your business rather than one giant leap. The AsotaHub stairway is presented in manageable steps. It is designed to first remediate or fix the major technology platform issues then to build on that platform in subsequent steps in a continuous process. Since the demands of the customers are constantly evolving, it is important to have a technology that can keep pace and a plan on how to get there. Every business is unique, and one size does not fit all in apparel or technology. Our team works to identify your business needs and priorities because everyone has a different starting point, business model and direction moving forward. Each individual stairway is the result of collaboration with the Force4Technology team and serves as a mutual guide as you consume each step in the stairway.

## Production Efficiency Dashboards

Pre-configured dashboards, KPIs and analytics put relevant data at your fingertips and eliminates the time spent gathering data across multiple places.

## Orders & Production

Order entry, management of multiple shipments per customer delivery schedule. Target management and line loading of orders, Production recording via Android tablet. Real-time update of dashboards

## Product Catalog

Visual database of products including components, tech packs and product images. Single point of access for style information.

## Time & Action Calendar

Manage day-to-day activities and operations involved in the completion of an order.

## Billing Management

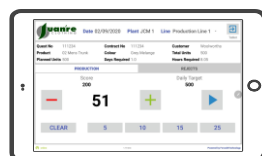

Billing process for generation of invoices including releasing.

## Customer Portal

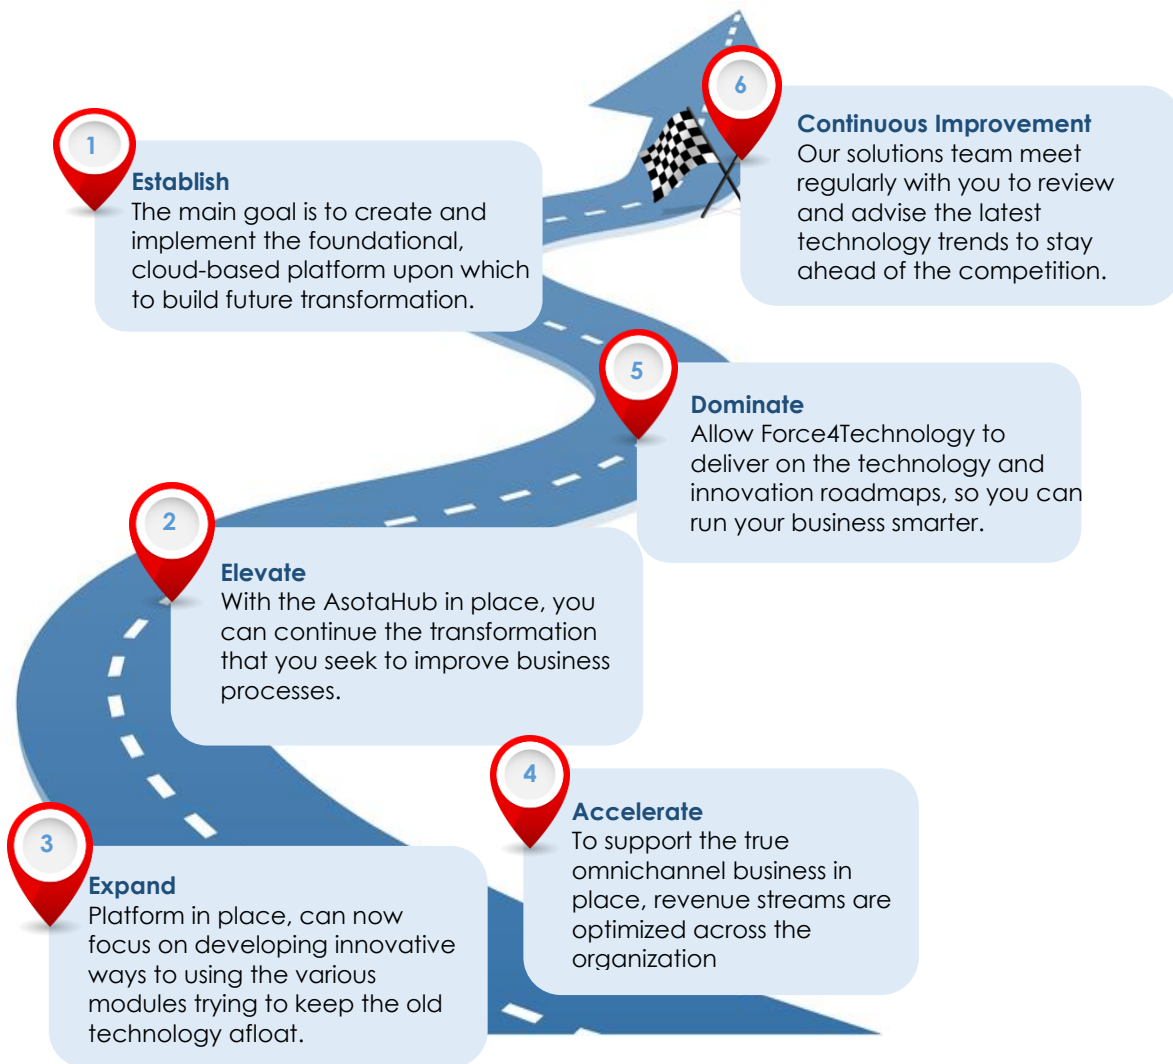

Share product catalog and order-related data with customer. Collaborate online.

# Roadmap to Success

## Leveraging our Expertise, Products and Services

We think differently. It is in our DNA. We are driven by an innovation mind-set, bringing new insights that challenge conventional thinking and assumptions. Nudging you out of your comfort zone to act and achieve more by leveraging our products and services to realize your technology ROI. Our engagement approach ensures client satisfaction and alignment with project deliverables and client expectations. The AsotaHub implementation strategy is explained below:

## Experts in Bespoke Technology Solutions

We know the right implementation approach and strategy: what works, what are the important points to consider and the pitfalls, to ensure your success when deploying an engagement tool. We educate and advise you every step of the way, starting from the initial meeting to the system blueprint, configuration, training, launch preparation, deployment, and into post-launch monitoring.

## Partnering for Success

We value our client relationships. The value we offer is not only in our world-class products and services but as your Technology Partner you benefit by the quality of our insights to take your organization to a higher level of performance.
