

Transforming Stakeholder Communications through Mobile Engagement

Helping Today's Organizations
Connect Their Stakeholders to Their Purpose to
Achieve Results

What is LetzTalk?

LetzTalk Stakeholder Communication Platform is a **mobile communications platform** that allows the organisation to engage in a more collaborative and inclusive way with all its strategic stakeholders such as **Employees, Suppliers, Investors & Shareholders, Business Partners, Dealer Networks, Alumni, Unions,** and local **Communities**. The platform allows an organization to demonstrate that it adds real value to the communities in which it operates by facilitating an on-going, two-way dialogue with stakeholders that over time builds trust, transparency and accountability of which supports a more inclusive economy and sustainable environment. The platform aids an organization to develop positive relationships with its key stakeholders even before a crisis arises and it supports a dedicated, real-time channel with targeted information and feedback mechanisms for each stakeholder group. The platform allows more effective communications by ensuring that the relevant content is reaching stakeholders all at the same time, and improves connections and conversations. It creates a place where an inclusive culture can thrive as it offers an open channel for stakeholders to be engaged, connected, and to be recognised and valued by the organisation.

Transform employees To Brand Advocates

Campaign new product launches, CSR initiatives, align company vision, and communicate company & employee achievements and awards.

Make workplace secure

Publicise ethics, security, compliance and safety & health related information, and broadcast emergency alerts.

Drive employee engagement

Create hall of fame, birthday announcements, ask for ideas, suggestions, feedback, invite to CSR events.

Onboarding employees or job applicants

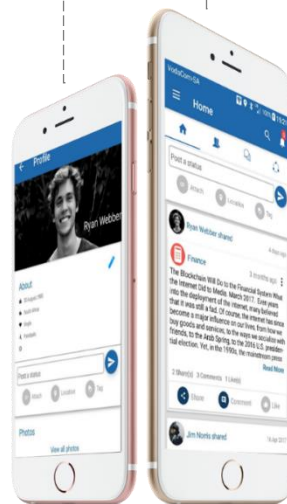

Digital onboarding and engagement. Process definition and tasks management. Transparency to all parties.

Share KPIs to transform business

Dynamic business data. Instant reporting. Put everyone on the same page. Make better decisions. Improve accountability. Increase healthy competition. Improve employee & company performance.

Open communication

Social networking, open lines of communication, employee participation, share updates, build internal community and forums.

connected
